DETAILED ACTION

Response to Amendment

1. This communication is in response to applicant's amendment filed August 17, 2005.

Claims 51-57 are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 51-57 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 51, 53, 55-57, 59, 60, 65, 67, and 73-75 of copending Application No. 09/846,434. Although the conflicting claims are not identical, they are not patentably distinct from each other because application '479 claims 51-57 and copending application '434 claims 51, 53, 55-57, 59, 60, 65, 67, and 73-75 recite a protocol for use in an ad-hoc, peer-to-peer radio system which comprising means for generating communications information for transmission on time division messaging and means for indicating initial presence of a respective terminal in the last time slot of a respective time frame in order to start communicating with other terminals. Copending application '434 claims 51, 53, 55-57, 59, 60, 65, 67, and 73-75 recite signals instead of communications information as

presented in application '479 claims 51-57. However, communications information and/or signals are equivalent in the art since both are ones and zeros containing data and instructions. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the terms exchangeable since both terms implying both data and instructions being carried.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

3. Applicant's arguments with respect to claims 51-57 have been considered but are moot in view of the new ground(s) of rejection.
